PROFILE

Graduated as an electronics engineer in 2019, I am a self-taught web developer, specialized in the Vue.js framework.

I have previous experiences in big companies and also start-ups.
I worked two years for MBDA (France), where I was in charge of developping software to test future weapon systems.
I also did a 12 months VIE program in Argentina for Eramet company.
I was recruited as an electrical engineer to participate in the pre-commissioning and commissioning of a lithium factory in the region of Salta.

PROJECTS

2023

WEB CV
• Link : gregoire-thomas.netlify.app
• Content : a static website that shows my portfolio and personal details.
• Languages used : HTML, CSS, Javascript
• Responsive design
